

Inspectra Testing Solutions Pvt. Ltd.

NDT, LABORATORY TESTING & PA66 ENGINEERING POLYMERS

ABOUT THE COMPANY

Inspectra Testing Solutions Pvt. Ltd. is a technology-driven JISK GROUP company specialising in advanced inspection systems, laboratory testing equipment, quality-assurance solutions and premium PA66 engineering-polymer raw materials.

The company supports industries where material performance, product reliability and quality compliance are critical, combining NDT technology, laboratory systems, polymer expertise, commissioning and technical support.

BUSINESS FOCUS

- Magnetic Particle Inspection machines
- Magnetic crack-detection systems
- Portable and conveyor-type MPI equipment
- Quad-barrel MPI machines
- Demagnetizers and gauss meters
- MPI consumables and accessories

Core capabilities

01 Magnetic Particle Inspection machines

02 Magnetic crack-detection systems

03 Portable and conveyor-type MPI equipment

04 Quad-barrel MPI machines

05 Demagnetizers and gauss meters

06 MPI consumables and accessories

07 Metallurgical testing equipment

08 Mechanical and hardness testing machines

09 Laboratory and calibration equipment

10 Quality-assurance systems

11 High-viscosity PA66 grades

12 Heat-stabilised and glass-fibre PA66

13 Impact-modified and flame-retardant PA66

14 Engineering polymer compounds

15 Material selection

16 Technical support and commissioning

INDUSTRIES SERVED

- Indian Railways and metro projects
- Automotive and heavy engineering
- Industrial manufacturing and OEMs
- Railway component manufacturers
- Steel, forging and foundry industries
- Testing laboratories and R&D organisations

Part of JISK GROUP's integrated ecosystem spanning manufacturing, testing technologies, engineering polymers, railway products and professional engineering consultancy.
